- EXTERNAL BODY ARMOR SHIELD

## Improving the Effectiveness of School Resource Officers, Improves School Safety.

When ordinary people are called upon to become heroes in protecting your school, you owe them the best equipment available.

Our objective is to quietly protect and empower campus safety officers, as your frontline of defense, without engaging teachers or traumatizing students

Designed for the unique needs of School Resource Officers & Campus Security

### SHIELD TECHNOLOGY INC.

- We go to work each day to make “front-line” safety products to protect those who protect you.
- We offer realistic, practical, affordable equipment to improve the odds in moments of chaos.
- Statistically, your having an on-campus gun incident is very low.
- However, the current environment is not going to allow you to rely upon that. Parents want assurances.
- *Stopping danger before it gets to the classroom should be your very first objective.*
- Your first line of defense are school resource officers, security personnel and male administrators.
- If you are counting on them to be your heroes, instill in them the confidence they need to act.
- Equip them with the most effective, maneuverable, external body protection available.
- We know your budget does not fund what is expected of you, therefore you can rent our products.
- Here are the most important features of our bulletproof shield;
  - Folded, compact and easily concealable so as not to disturb the students.
  - Unfolds in less than a second.
  - *Provides a broad area of bulletproof protection.*
  - Weighing only 5 pounds, it is easily gripped in one hand,
  - Provides complete range of motion maneuverability.
  - Because it is external of the body, there is no bruising or wounding if struck by a bullet.
  - When ordinary people must be the aggressor to stop chaos they have greater protection.
  - There is no other low cost, immediately-effective solution on the market today.
  - Our shields can be rented for less than \$30 a month. Please call us for more details.

Resistant to 9mm, 44mag & 357mag

Seams are also bullet proof
